

## Turf Tonic

Turf Tonic contains Nitrogen, Fe and Soluble seaweed to boost grass growth and produce a rapid greening effect.

EC Fertiliser: Nitrogen 2.30% w/w; Ferrous Sulphate 12.60% w/w; soluble seaweed

Novastar Link Turf Tonic is for foliar application. Novastar Link Turf Tonic is particularly recommended to improve grass hardness and 'green-up' and will help to reduce pH. (The availability of Fe increases with declining pH.)

### APPLICATION RATES FOR TURF

For 10 sq m of turf, apply 300 mls. Turf Tonic mixed with either 9 litres of water with a watering can or 1.5 litres of water with a sprayer.

### MIXING INSTRUCTIONS:

1. Water
2. Add Novastar Link Turf Tonic which disperses in water with agitation.

WHEN TO USE: Can be applied between March and late September.

Treatment is most effective during the spring and autumn.

For best results spray when turf is actively growing. Do not spray during very hot, dry or bright weather.

### FOR USE ON TURF & LAWNS

Do not apply to lawns sown or turfed less than six months ago. Very detrimental to moss – do not use if moss health is important. Do not apply under drought conditions, if frost is expected or if the area is waterlogged.

Ensure complete and even coverage. If rain does not fall within 48 hours, water lawn lightly to assist the nutrients in reaching the roots.

Novastar Link Turf Tonic is manufactured to rigid controls under ISO accredited Quality Management.

Any residue is water soluble. Rinse bottle with water and add solution to spray tank.

*Danger of serious damage to health by prolonged exposure through inhalation and if swallowed.*

*Keep out of reach of children.*

*Handling: Wash hands and exposed skin before meals and after use.*

*Wear gloves when handling the product over long periods of time.*

*Do not eat or drink.*
